

Arizona Corporation Commission Water Conservation Tariffs

The Arizona Corporation Commission (ACC) regulates private water companies throughout Arizona. The ACC sometimes requires a water company to implement water conservation best management practices (BMPs) developed by the ADWR as part of the Modified Non-Per Capita Conservation Program for large water providers in Active Management Areas.

Although ACC and ADWR regulations are separate, the agencies have a cooperative relationship with regard to water conservation programs.

For more information about the BMPs, go to: [Description of the Public Education Program and Best Management Practices.](#)

For more information about the ACC, go to: azcc.gov/divisions/utilities/water.
